•Dual Band CDMA2000 1xRTT / 1xEVDO / 1xEVDO Rev. A (800/1900 MHz)

•Memory: ROM: 512MB, RAM: 512MB DDR

•Qualcomm® QSD8650, 1Ghz

•Dimensions: 4.63 x 2.3" x .47";

•Weight: 4.59 oz.

SAR: Head: 1.40 W/kg ; Body 0.7 W/kg

• Usage: up to 312 mins. OR

•Standby: up to 146 hrs

The Wireless Devices Group Introduces the DROID INCREDIBLE by HTC to the Product Line-up! The DROID INCREDIBLE by HTC will be available for Pre-Order on April 19th, 2010 on the web and will launch in All Channels on April 29th, 2010!

The new Droid Incredible with Google: YOU want a phone with attitude

Super sleek on the outside, 8-megapixel camera on the inside.

Slick form factor: YOU look marvelous. With its sports-car-inspired body design and 3.7" HD screen, the Droid Incredible is always dressed to impress.

Superior camera: YOU are a shutterbug. What will you do with the 8-megapixel camera with auto focus and 2x power LED flash? Capture all of your favorite moments in super-crisp detail with a variety of effects options from sepia to posterize, crop them and post directly to your favorite social networking sites. People may think you're paparazzi.

Undeniable speed: YOU better buckle up. The Droid Incredible uses its 1 Ghz Snapdragon processor and 8GB internal flash memory to provide you with a super-fast performance.

Navigation: YOU know the way. Feeling a bit lost? Use Google Maps to steer you clear of trouble and keep the party rolling.

Contacts closer: YOU like things tidy. HTC Sense automatically organizes all of your incoming emails, texts, Facebook messages and tweets by sender so all of your latest communications remain in their proper order.

Customizable: YOU scored! Your Droid Incredible comes preloaded with many helpful tools including the Footprints, Friend Stream and Weather widgets. Make it yours.

The Droid Incredible Target Consumer

WHO: Power Connectors

They work to live. They're at meetings, at openings, dinners, out for a drink. They need constant access to work but without being branded a "suit". Play is the badge they want to cultivate and wear.

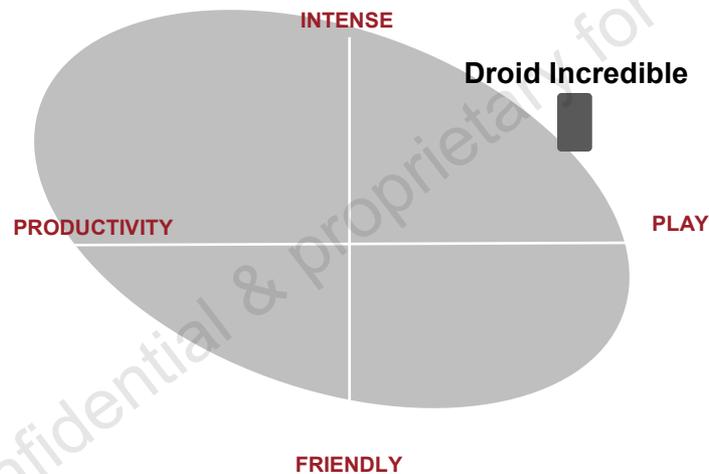

Demo: Male/Female 25-44

ATTITUDE:

Their phone is a personal expression of who they are, the hub of their busy social lives – texts, pictures snapped in the moment & shared. And that little bit of flash (ID) suits their style.

PHONE WANTS:

Great design and exceptional performance

phandroid
Confidential & proprietary for authorized Verizon Wireless personnel only.

HTC Sense™

HTC Sense is a holistic experience that focuses on making phones work in the most intuitive way. Simply making things work the way they should. HTC Sense is focused on putting people at the center by making your phone work in a more simple and natural way.

HTC Sense is based on three core principles:

Make it Mine.

Stay Close.

Discover the Unexpected.

HTC Sense – Make it Mine

Customize: Bring your favorite content to the surface of your Home screen: Twitter™, pictures, Friends Stream, weather, stocks, email, and more than a dozen different clocks.

Multiple phones in one: Create and switch between Scenes to turn your Droid Incredible into the perfect weekend phone, travel phone, or pure play phone.

Personalize: With Android Market™ apps like Amazon, Flixster, and more, the possibilities are 30,000-fold and growing

Verizon (default)

Work

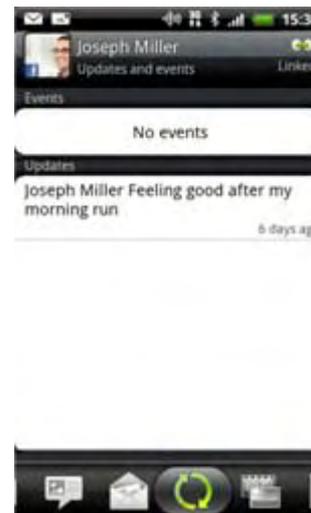

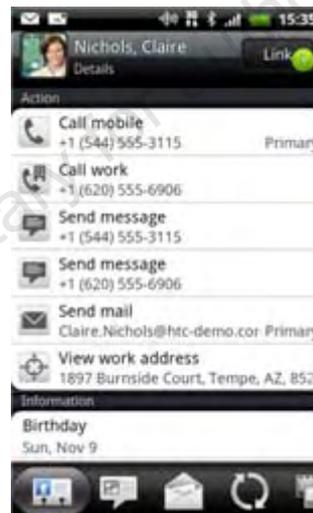

Play

HTC Sense – Stay Close

Make mobile communication as simple as turning to your friend and saying hello.

People at the Center. Want to see what what's up with Claire? Simply go to her contact card where you'll find one touch access to all the texts and emails she's sent you, her Facebook and Flickr updates and call history. How's that for close?

Friend Stream. Fresh to HTC Sense, now both Facebook and Twitter feeds update within one application – Friend Stream. It cuts the places you go for info in half! Sweet!

HTC Sense – Discover the Unexpected

Smart Dialer. Think it. Dial it. Call your friend by typing their name, just their initials, or even the first digits of their phone number.

Weather. Heading to Albany? The weather forecast is updated automatically based on your location, and cinematic weather wallpaper makes raindrops look exciting.

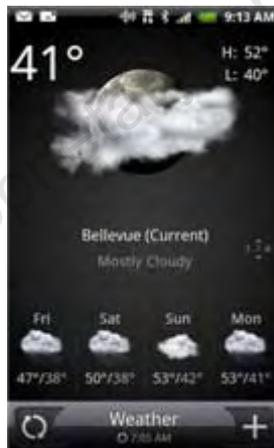

Photo Albums. Your Album does more than display the awesome pictures you take with the 8 MP camera, it is also a gateway to online collections on Facebook and Flickr, both yours and your friends.

Pinch and Zoom. Look closer, read easier, surf with more fun with simple, intuitive controls.

Leap. A helicopter view of all seven screens in one.

Features and Advantages

<i>Features</i>	<i>Benefits</i>
HTC Sense	<ul style="list-style-type: none">• 7 Customizable Home screen panels• HTC Widget layout options
Visual Voice Mail	Visual Voice Mail allows the management of voice mail directly from the device rather than accessing your voice mail via traditional methods.
Backup Assistant	<ul style="list-style-type: none">• Never lose your Address Book contact information again!• Sign in or create a new Backup Assistant account from the HTC Setup Wizard and download all of your existing contacts from your old phone.
City ID	Enhanced caller ID: automatically displays the city and state with incoming call to help identify who is calling if the number is not in your contact list.
WiFi (802.11 a/b/g)	To use Wi-Fi Internet on your phone, you need access to a wireless access point or "hotspot". Wi-Fi provides wireless Internet access over distances of up to 100 meters (300 feet).
Stocks, Weather, Twitter Widgets	Access this useful information by adding the widgets to one of your home screen panels.
Exchange Sync	Sync your Outlook Calendar, Contacts, and Email.
Google Services	Android Market Applications Navigation with turn-turn directions Google Maps Google Talk Gmail
Footprints Application	A Geo Tagging Photo application that allows users to tag a photo with date, time, location details, as well as adding your own personal audio notes and comments about the image essentially creating a digital post card.
Media Up loader Application	Allows users to upload photos directly to their favorite posting sites such as Facebook, Flickr, Gmail, Email, Messaging, Peep, and Picasa.

Customization

Customize to your heart's content.

Make your phone look and sound just the way you want it. Personalize your phone with a different wallpaper, ringtone, and notification sound for events such as incoming text, email, calendar reminders, and more.

Your phone's Home screen is highly customizable and extends beyond the screen width, giving you plenty of space to add the information that matters most in your daily life and phone features that make communication quicker and easier. You have up to seven screens that extend to the left and right sides of your display as your Home screen, on which you can add elements such as widgets, program icons, shortcuts to information, and more.

Notifications Panel

Notifications let you know when an event has occurred that may require your attention such as voicemail, missed calls, text messages, Android Market download, calendar reminder, etc.

To View the Notification Panel:

Touch the status bar at the top of the screen and drag it down. Touch each notification to view the details. When you are done, touch the **Home Key** to return to the home screen or simply tap the bottom of the notification panel to send it back up.

Types of information that is delivered via the notifications panel:

- All messaging – Email, text, picture, video, IM
- Missed Calls
- Voice Mail
- System updates
- Android market updates
- Application updates
- Calendar events
- Apps Such as scoreboard apps, weather apps

Tue, Mar 30, 2010 3G 9:12 AM

 **DISK drive**
Select to change USB connection type

 **USB debugging connected**
Select to disable USB debugging.

All Programs Tab

From the home screen, touch the All Programs button to open the All Programs tab. Open an application simply by touching it.

All Programs icon

Touch Screen Gestures

There are several touch motions recognized by the device:

Touch – to select a menu item or open an application

Touch and hold – to grab an object that you want to move or open an option menu

Pinch: For some applications, like Albums or Browser, you can “pinch” the screen using 2 fingers (for example, thumb and index fingers) to zoom in or zoom out when viewing a picture or a webpage.

Drag – to move an object or scroll slowly on a list or web page

Flick – to scroll quickly on a list or web page (touch the screen again to stop the scrolling action)

Leap – pinch to jump between the 7 panels on your Home screen

Sleep Mode

Your display will go dark if untouched for a period of time. Press the **Power/Lock Key** to wake it up again.

From any screen, you can put your display back into sleep mode. Just press the **Power/Lock Key**. This will prevent false key presses as well as help you conserve battery life.

File Syncing

your computer*

Transferring music, video, pictures, and more from your PC over to your Droid

Incredible isn't very different than transferring files from one folder to another on

1. Connect the phone to your computer using the supplied USB cable. When the Connect to PC dialog box appears, tap Disk drive, and then tap Done.
2. On your computer, the connected phone is recognized as a removable disk. Navigate to this removable disk and open it.
3. Do one of the following:
 - Copy the files from the computer to the phone's storage card's root folder.
 - Copy the files from the phone's storage card to a folder in your computer or computer desktop.
5. After copying the files, unmount the removable disk (that is, the connected phone) as required by your computer's operating system to safely remove your phone.
6. Do one of the following:
 - Disconnect the phone from the computer.
 - If you want to keep the phone connected to the computer but want the phone to be able to access the storage card, open the Notifications panel, tap Disk drive, select an option except Disk drive, and then tap Done. See "Opening the Notifications panel" in this chapter to learn how to open the Notifications panel.

Audio Formats Supported: MIDI / M4A / QCP / AMR / AAC / AAC+ / eAAC+ / WAV / WMA / MP3 / EVRC-B

* DRM content not supported

Social Networking Integration to the next level

Built-in Facebook® integration keeps you up-to-date with your friends and family.

- Links Facebook Status updates, Events, and Profile Photos directly to your Contacts.
- Get one-touch access to friend's Profiles
- Never miss another Birthday or Anniversary
- Check up on Events your friends are attending
- Flickr photo album updates

Includes HTC Peep - Twitter™ app allows YOU to join in the global conversation about anything!

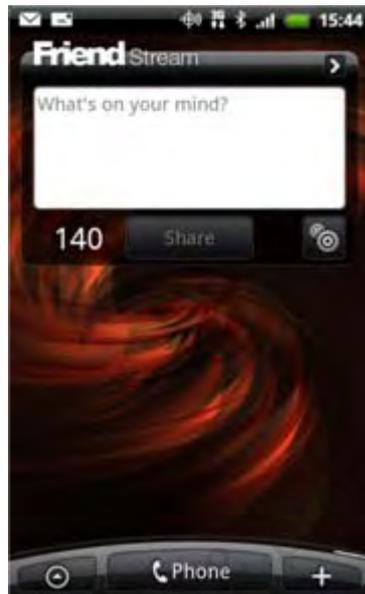

- Tweet from anywhere, see @ replies and Direct Messages, follow your Favorites, and more!
Lives on your Home Screen and keeps your feed updated
- Peep Widget –

New – Friend Stream

All the updates you could ask for in one easy place

Streamline your social network accounts through Friend Stream. Update your status simultaneously, view status updates, and look through photo updates from your Facebook, Twitter, and other social network accounts using Friend Stream.

Confidential

New – Enhanced Home Screen Weather

Up-to-date weather

The HTC Clock widget that's by default added on the Home screen shows your current date, time, and location. If it's rainy outside, it's raining on your Home screen. If it's frosty out, it's frosty on your Home screen. You can tap the weather image on this widget to open the Weather application and check for more weather forecasts.

Use the Weather widget, which comes in different looks and styles, to instantly check weather forecasts of your current location and other cities without having to open the Weather application.

New – Quick Contact

Make your communication faster

From People, tap the photo or icon of any contact to open a menu where you can quickly choose how to communicate with that person. Depending on the contact information stored, you can call, send a message or email, see the contact's Facebook profile, and map his/her address in Google Maps.

New – Polite Ringer

Instantly quiet the ringer

Just like magic your phone ringer quiets when you pick up the phone.

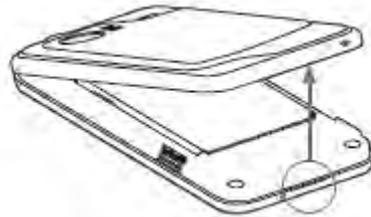

HTC Helpful Hints

Installing the battery

You need to remove the back cover before you can install the battery and storage card. Also, make sure to always turn off the power before installing or replacing the battery.

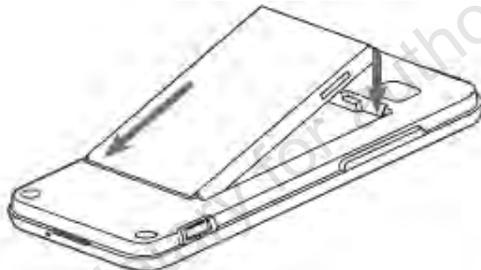

To remove the back cover

1. Make sure your phone is turned off.
2. Hold the phone securely with the front panel facing away from you.
3. Pull the cover open with your finger from the gap at the top of the phone.

To install the battery

1. Align the battery's exposed copper contacts with the battery connectors at the bottom part of the battery compartment.
2. Insert the contacts side of the battery first and then gently push the battery into place.
3. Replace the back cover.

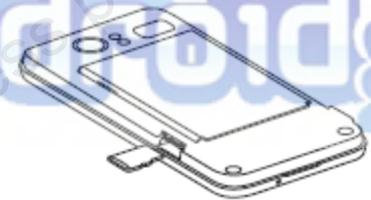

Removing the battery

Lift out the battery from the groove at the upper side of the battery compartment.

Installing a microSD (8GB pre-installed)

1. Remove the back cover.
2. Locate the microSD card slot on the lower left part of the exposed panel.
3. Insert the microSD card into the slot with its gold contacts facing down until it clicks into place.

Note To remove the microSD card, press it to eject it from the slot.

Helpful Hints – Getting Started and Keeping Going

Powering your wireless device on for the first time

It's important to fully charge the battery before turning on your wireless device.

1. Press the POWER button on top of the phone.
2. When you turn on your phone for the first time, follow the instructions on the screen to activate your device and set up the rest of the device through the HTC wizard including email, social networking and more.

Powering your wireless device off

1. Long press the POWER button on top of the phone for a couple of seconds.
2. Tap **Power Off** on the Quick List.

Checking the hardware / PRL / PRI Browser and ERI version(s) on your device

You can find the information easily by selecting the following path:

From the Home screen, Tap Menu > Settings > About Phone > Software Information

(PRL, PRI, Browser Version, ERI Version)

Manually Programming your device

1. Power on the device.
2. Select **Phone**. Press [#] [#] [P] [S] [T] (##778) [Call].
3. Select EDIT Mode and enter **SPC Code**. The default code is **000000**. Then press **[OK]**.
4. The EPST is now displayed. Select **NAM SETTINGS** from the menu.
5. Select Desired field and enter the information.
6. Touch Menu and select Commit Modification.
7. Press **[OK]** to update items and reset the device. Device will reset.

OTA Instructions for your device

1. Perform the usual billing system activation procedure.
2. Power-up the phone and enter Star Code, ***228** [Send].
3. The following audio message will be heard: **"Welcome to Verizon Wireless' device programming . This call is airtime free. To program your phone, press 1. Update your roaming capabilities, 2, to switch devices and use your same mobile number, 3."**

Note: Programming will take up to 2 minutes. Should the programming exceed 45 seconds, the following audio message will be repeated at 25 second intervals: **"Please continue to hold. Your phone is being programmed."** You will hear an audio message once the phone has been successfully programmed.

Helpful Hints – Battery Life & Phone Calls

Maximizing Battery life

Changing device settings can preserve battery life.

Turn off Bluetooth when not in use:

- **Menu > Settings > Wireless & networks** and tap **Bluetooth**.

Adjust the **Backlight** settings to lower brightness, change screen time out

settings, and adjust notifications (email, SMS, etc.)

- **Menu > Settings > Sound & Display**.

Customize your email synchronization interval.

**Menu > Settings > Accounts & Sync > Exchange
ActiveSync
> Schedule.**

Placing and Receiving Calls

Placing calls

Tap **Phone** on the Home screen to open the Phone screen.

Tap the keys on the keypad to enter the phone number or the name of the contact you wish to dial.

Tap the **Call key** to place the call.

NOTE : If you tapped a wrong number, tap the BACK key to erase each

subsequent digit of a number.

Receiving calls

To answer the call, tap **Answer** icon.

To reject the call, tap **Decline** icon .

Using Speakerphone and Mute

During a call, tap the Speakerphone icon or the Mute icon on the call screen to invoke the speaker or mute functions.

Helpful Hints – Quick List, Locking Phone and Email

The **Quick List** enables you to power off the phone and offers convenient access to a list of other functions, such as placing the device in Silent or Vibrate mode as well as placing the device in Airplane mode or turning on/off the Mobil Network data connections.

Note: The phone will enter Sleep mode in 10 seconds if you do not make a selection from the Quick List.

To access the Quick List

1. Press and hold the POWER button.
2. Select the desired option.
3. To exit the Quick List at any time, click **Home or Back Key**.

Locking your phone

Your phone automatically locks when one of the following occurs:

- The display is turned off and your phone goes to sleep mode.
- Your phone is password protected, and the set idle time has elapsed. Your phone locks itself and requires the correct password entry to unlock it.
- You can also lock the phone manually. While anywhere in the device short press the **POWER** key.

Using Email

After setting up email accounts on your device, you can start sending and receiving email messages.

Creating a new email message

1. On the Home screen, tap on the Mail icon.
2. Press Menu and select **Compose**.
4. To add recipients, enter their e-mail addresses or type their name. When the end user address appears, press the name to add to the "To" list.
5. Enter a subject and compose your message.

Tips

- To add an attachment to your message, tap **Menu > Add attachment**.
Choose attachment format and select the file to be attached.
- When finished composing the message, tap **Send**.

Helpful Hints – Bluetooth Technology

Bluetooth® Wireless Technology (v 2.1 w/ EDR)

The Droid Incredible supports Bluetooth wireless pairing. You can pair your smartphone with a Bluetooth stereo headphone, headsets or car kit. Bluetooth on your device operates in three different modes:

- * **On** - Bluetooth is turned on. Your device can detect other Bluetooth-enabled devices, but not vice versa.
- * **Discoverable** - Bluetooth is turned on, and all other Bluetooth-enabled devices can detect your device.
- **Off** - Bluetooth is turned off. In this mode, you can neither send nor receive information using Bluetooth.

Note: For additional information on car kit and accessory compatibility go to: www.verizonwireless.com/bluetoothchart

Droid Incredible supports the following BT profiles: Mono and stereo headset (HSP), Hands-free (HFP), Stereo (A2DP), Phonebook Access (PBAP), Object Push Profile (OPP)

To turn Bluetooth on and make your device visible

1. On your device, tap **Menu > Settings > Wireless & networks** and then tap **Bluetooth** to turn on or off. The icon will appear on the status bar. Under Bluetooth settings, press Discoverable to make the device discoverable for 2 min (120 seconds).

To Connect a Bluetooth hands-free or stereo headset

1. Make sure that both your device and the Bluetooth headset are turned on and within close range.
2. Tap the All Programs Icon > **Settings > Wireless & net works > Bluetooth Settings.**
3. Press **Scan for devices.**
4. Select the hands-free or stereo headset device in the list. Your device will automatically pair with the Bluetooth headset.

Note Your device will automatically try one of the preconfigured passcodes (0000, 8888) to pair with the Bluetooth headset. If this fails, you have to manually enter the pass code delivered with your headset.

5. When connected, the hands-free or stereo headset device is shown on the screen in the Bluetooth devices section with the pairing status of the device.

To create a Bluetooth partnership

1. Tap  > **Settings > Wireless & networks > Bluetooth Settings.**
2. Press **Scan for devices.**
3. Tap a Bluetooth device to connect with.
4. Specify a passcode, which can be 1 up to 16 characters, to establish a secure connection, and then tap **OK.**
5. After the receiving party accepts the partnership, the Bluetooth device name is shown on the screen.
6. The connected Bluetooth device now appears in the Bluetooth Devices list view on the Bluetooth Settings page.
